

**Instructions:**

Read the text from the textfile, and put the text in a variable. (song.txt)

*Somewhere over the rainbow way up high There's a land that I heard of once in a lullaby Somewhere over the rainbow skies are blue And the dreams that you dare to dream really do come true*

→

**Result:**

*urt emoc od yllaer maerd ot erad uoy taht smaerd eht dnA eulb era seiks wobniar eht revo  
erehwemoS yballul a ni ecno fo draeh I taht dnal a s'erehT hgih pu yaw wobniar eht revo erehwemoS*

**Help:**

You can handle the text type variable as an array. For example: s='dog'

s[0]='d'

s[1]='o'

s[2]='g'

My code is very short and simple, only 7 rows.
